Where does Indian IT see itself in  
next 10 Years ?

What kind of Data Scientist are you ?

# Rishabh Malhotra

Founder at THE DatumGuy

Delhi

## Summary

Hey guys! I'm Rishabh. ' .##

##

Like you, I'm a man who loves to play with data and to devise ways  
to solve a major pain-point.##

##

It was back in 2014 that I was watching the TV Series - Person of  
Interest, that I was introduced to Artificial Intelligence and its mind-  
numbing scale.##

##

I couldn't help but enroll myself in an intensive Data Science  
program at CDAC, Pune, that very summer.##

##

Upon finishing my program, I bought books over books to deepen my  
understanding of every domain of Data Science.##

##

It was in late 2017 that a few of my colleagues mentioned how  
they fear to become irrelevant in the market as they lack any  
understanding of AI.##

##

Just like me, they couldn't find any well put-together online resource  
that could help them learn Data Science in a disciplined manner.##

##

They asked me to help them out.##

##

THAT WAS MY EUREKA MOMENT!##

##

After helping over a dozen of my colleagues, in early 2018, I put  
together an end-to-end Data Science program that cuts through the  
noise in the AI world and provides an ultimate shortcut to become a  
full-stack Data Scientist in 6 months.##

##

My end goal is to work on gigantic AI projects. And for that, I'd need  
an elite group of Data Scientists who understand the domain inside  
and out.##

## Experience

Datum Guy

CEO and Founder

April 2018 - Present (2 years 5 months)

New Delhi Area, India

Cympl

Data Science Consultant

September 2018 - July 2019 (11 months)

Cympl

Data Science Consultant

March 2018 - April 2018 (2 months)

New Delhi Area, India

BancTec

Data Scientist

November 2016 - December 2017 (1 year 2 months)

India

- Worked on Document Classification and Clustering using natural language processing techniques as well as Image Processing Techniques to gather Insights from both Images as well Text level of data.
- Worked with various NLP techniques namely Bag of Words, TF-IDF, TF-IDF-CF, POS-Tagging and word embeddings etc.
- In image processing worked with the approach of Document layout analysis to find and recognize most different and densely populated portions of the documents to make it useful in classifying different kinds of documents.

Resilinc Corporation

Data Analyst

February 2016 - November 2016 (10 months)

Pune Area, India

- Performed statistical analysis on the customer web data to track customer usage of the product and generate engagement reports.
- Performed Risk Analysis and have applied various statistical and predictive models like naive forecast, time series analysis, multiple linear regression on the supply chain demand data to produce insights.
- Played an integral role in the development of the "R-Score" Project. The project goal is to measure, benchmark, and track companies' supply chain risk and resiliency. My main responsibility was to develop and compute key metrics (Transparency, Network, and Continuity) for the system.

---

## Education

### Centre for Development of Advanced Computing

Post Graduate Diploma, Big Data Analytics · (2015 - 2016)

### Ambedkar Institute of Advanced Communication Technologies and Research

Bachelor of Technology (B.Tech.), Computer Engineering · (2010 - 2014)
