Development of an ipad system using Python

Harshitha R D

Looking for Data Science Intern | Explore ML facilitator | Core team member DSC | AI enthusiast | Researcher | Speaker
Chennai

Summary

One who desires to learn and acquire knowledge does so by finding his own ways and exploring opportunities. As an undergrad student I have embraced every opportunity that I ever came across and these have helped me learn and grow. By "learning" I do not simply mean the academic knowledge one desires to acquire instead, I also refer to every life lessons and experiences that form an integral part of development.

As a research aspirant, I wish to complete my masters abroad and pursue a career in research in the Machine Learning(ML) and Artificial Intelligence(AI) domain and contribute to these domains.

Experience

National University of Singapore

Student Intern

December 2019 - January 2020 (2 months)

Singapore

Data Analytics and deep Learning

IIT Madras Foundation

Research Intern

May 2019 - June 2019 (2 months)

Chennai Area, India

IIT Madras Research Park

Winter Intern

November 2018 - December 2018 (2 months)

Chennai Area, India

Contributed to the development of a generic processor based on an open instruction set architecture(ISA) by RISC-V foundation. Was a part of the testing team .

Education

Shanmugha Arts, Science, Technology and Research Academy
