Bengaluru, Karnataka, India

=> Supplier Selection

===

-> Identified parameters to evaluate suppliers through online research and
interviews of technical team.
-> Utilized Analytical hierarchical Process (AHP) to assign weights to
parameters, by taking inputs from past projects, technical purchasing team and
guide.
-> Collected data from suppliers through formal and informal communication
on the selected parameters.

-> Assigned ranking to suppliers, on parameters, based on information provided by suppliers and finally recommended a supplier to management.

==

=> Automation of project tracking and capacity planning

==

-> As-is situation : Management has to do the process of analysis manually on excel, which takes time, resources and was prone to errors.
-> Created excel MIS tool for tracking health of cost saving projects and generating report for capacity planning.
-> Utilized Macros to automate report generation and calculate schedule variance of cost saving projects.
-> Automated generation of Bar/Line graphs and table for capacity planning reports.
